## CUSTOM ELECTRONIC SAFETY DEVICES

### Light Curtains

Light curtains are photoelectric presence-sensing devices that create an invisible barrier around a machine or operation zone. When the beams are interrupted the machine shuts down.

### Area Scanners

Area scanners monitor an entire user-defined area. This helps shut down a machines operation when someone or something enters into the specified danger zones

### Pressure Mats

Pressure sensitive mats can act as an emergency stop when stepped on. They can also be wired in reverse to activate a stop response when pressure is removed from the mat.

### Safety Switches

Safety switches come in a variety of styles and options including contact, non-contact, locking, and non-locking. These devices help turn your machine guard into a safeguard.
